SKILLS

Design & Research:

User Research
User Interviews
User Flows
Wireframing
Prototyping
Usability Testing
Qualitative Analysis
Information Architecture

Languages & Tools:

Figma/Figma Make
Sketch
HTML/CSS
React
TypeScript
Miro

EDUCATION

MSC. HUMAN COMPUTER INTERACTION

2024-2026

Utrecht University
Utrecht, Netherlands

Relevant Courses:

Adaptive Systems
Multimodal Interaction
Research Methods

BASC. SYSTEMS DESIGN ENGINEERING

2017-2022

University of Waterloo
Waterloo, Canada

Relevant Courses:

Interface Design
Human Factors in Design
Cognitive Ergonomics

WORK EXPERIENCE

SOFTWARE ENGINEER

MAY 2022 - AUG 2024

Compass Digital | Mississauga, Canada

- Led end-to-end implementation of a promotional checkout feature, partnering with designers and PMs to drive a **14%** increase in campaign adoption.
- Developed bulk editing and menu import workflows that eliminated high-volume manual data entry, saving operations teams **15+ hours** weekly.

UI DEVELOPER INTERN

SEP 2020 - DEC 2020

Zighra Inc. | Ottawa, Canada

- Designed and built **end-to-end user flows** for key platform features, including signup, profile and event creation, and video chat (Figma, React, TypeScript).
- Effectively collaborated in an **Agile** team to ship production-ready UI and ensure smooth client onboarding and reliable deployments.

SOFTWARE ENGINEER INTERN

JAN 2020 - APR 2020

Thomson Reuters | Toronto, Canada

- Built invoice review and billing workflow features for Legal Tracker, reducing user friction in high-stakes legal processes for 40,000+ law firms (MySQL, C#).
- Improved the **end user experience** through defect resolution and unit tests.

PROJECTS

REDESIGNING MUZIEKWEB FOR GENERATION Z

OCT 2025 - JUN 2026

MSc Thesis (Qualitative Research + Web Application) | Utrecht, Netherlands

- Conducted 19 **semi-structured interviews** with Gen Z music enthusiasts and cultural heritage professionals, applying a **Value Sensitive Design** framework to translate stakeholder values into concrete design requirements.
- Prototyped a redesigned platform interface in **Figma Make** and validated it through a UX evaluation survey and stakeholder feedback sessions.

OPTIMIZING THE CLEANER WORKFLOW

FEB 2025 - APR 2025

Ad-hoc Task Management (Mobile Application) | Utrecht, Netherlands

- Conducted **domain research** and **stakeholder interviews** in a team of 4 to find pain points and inefficiencies in ad-hoc task management for cleaning staff.
- Translated research findings into design requirements, driving development of a **Figma** prototype that directly addressed identified workflow inefficiencies.

HEALTHRA

SEP 2021 - APR 2022

Health Information System (Web Application) | Waterloo, Canada

- Co-designed a patient-facing health information system in **Figma** with a team of 5, synthesizing user needs to unify access to fragmented medical records.
- Applied **human factors** and **information architecture** principles across multiple design iterations to reduce cognitive load viewing health data.
